You've never seen anything like this! Spacejacked is an incredibly polished, fast-paced and challenging experience that mixes elements of 2D platforming, tower defense with a great strategic layer built above it. Every choice matters in the game, and you would be making important decisions on what to build and not to build as your resources carry on to your next mission/day. On a micro level, you will see yourself frantically managing your towers, reading enemy patterns, repairing your base. The graphics are really slick and smooth too!

This is one of the freshest and most innovative game that has come out from the indie community, which has seen a lack of creativity in recent years. Support the devs!. This is a short, fun puzzle game. Reminds me of Machinarium. The Steam achievements are fun but as I mentioned its very short. Took me around 5 hours to beat my first time playing. I played it a second time to get some Steam achievements and it only took an hour. Overall its worth the 2.50 I payed, probably worth 4.99, but I dont know that I'd pay the full 9.99 for it.. I know that this game looks like a demo. I know the trailer doesn't catch your eye. I know it looks extremely simple. I know it looks boring.

But trust me: give it a go. It's incredibly fulfilling.

The reviewers weren't lying: this game really does make you feel like God.. great game loved it it just is not a game you can play fr to long. This game doesn't quite hold up as a hack-and-slash, but it has nice roguelike mechanics that make it worth a least one playthrough. this is not enabled by default you must do it manually. right click the game ==> game properties ==> dlc tab ==> check the unchecked box. :happyface:
seems to be the only one like this.. The music and illustrations work brilliantly together to make this a very happy program. Though not a game, not even a visual novel, Little Storm is a beautiful work of art, easily worth five minutes of your time.. This was very disappointing since I did like some of the previous games.

This is probably the preachiest of the lot, which is saying something, considering how the author seems utterly incapable of writing about societal issues in a non-hamfisted way. The entire game is full of clumsily written speeches that feels more like they're coming from the author than the characters themselves.

A huge focus in this game is discrimination, which I thought would be interesting. But instead of being shown instances of the discrimination our PC apparently faces we're just sort of told it exists. According to the author we're obviously supposed to care about it, and you don't really have much of a choice.

If you choose to be uninterested in politics and instead focus on your sister (who is DYING by the way) you're almost punished and berated by the game, which is absurd. The author also seems to hold a bit of a grudge against certain characters, like the character Griffin (who's a RO!) whose only crime as far as I know is that he enjoys a bit of attention and isn't very bright.

The author really needs to begin distancing themselves a bit from what they're writing because it's not doing them any favours. There's nothing wrong with having social commentary in your game. But author, if you're reading this, please try taking a step back in your next games and let the characters and world speak for itself. It's jarring to feel judged for your choices by the author in a game that's supposedly built on choices.. Does everyone remember how awesome The Elder Scrolls Oblivian was when it came out? This game, though a work in progress, has that feeling. The mechanics alone are the reason why I bought it. However, it also has good graphics (becoming amazing every patch), rich and fulfilling combat, and the possibility for so much more. The developers listen to the players, and they really care about their work. So, if there is/was something you care about in this game they will hear you out on it. I can't wait to see what this game turns out to be.

EDIT: I think that the game has been abandoned. The has not been any update or new content since January 2016 at this point.. Painfully average. Decent graphics and new ideas are squandered with terrible gunplay and design. Decent enough if on a steep sale, otherwise don't bother.

pros:

you get to kill anime
tight controls
requires mad skillz

cons:

you are the anime
has only one waifu skin to kill

in the middle of the match a player named god left the game. ITS
GOOOOOOOOOOOOOOOOOOOOOOD!!
BUT NOT AS MUCH AS HUMAN CONDITIONS

. 8.5V10 My ears enjoyed it

#First!. Would be a little more fun if the graphics weren't so rough. The bike looks pretty good, but everything else is blurry. Not much depth to it, but for less than \$4 what does one expect. Would be nice if a project like this ended up being like Road Redemption or Road Rash. I used an xbox 360 controller. Holding your hands up with the motion controller get uncomfortable after a while. It's more accurate and you still have the feeling of being on the bike using a standard controller. If the devs could sharpen those graphics it would be a decent time killer.. Ive activated it in steam AND Uplay....nothing. I cannot get Hurks dlc to show up.. If you like Limbo, I wouldn't suggest this game.

It's just a sloppier clone with some frustrating gameplay mechanics.

Far too many times I died because of trial and error - some land you can walk on, some kills you, yet you wont know until you die to it.

Yes you die a lot in Limbo from the unknown, but it never felt cheap. You either rushed in or didnt react quick enough.

In this game, it just kills you to feign some sort of challenge or depth. The rules also change whenever they feel like it. You might learn one mechanic, for it to change in the next room. And while that may sound innovative, it is implemented poorly. I gave this one a real chance to try and recapture some of the immersiveness I felt from Limbo, but it came nowhere close, and I just left angry and disappointed.. Forewarning: I like games mostly based on (pixelated) aesthetics, and find high replay value in extremely simplistic places.

I can't believe how much fun I'm having on 50 cents. I was a little apprehensive about the non-sale price tag, but I'm now willing to say I would have paid full price for this gem, and I feel like it's a steal on sale. If you favor the arcade style and / or graphics that look like they just popped out of a Sega Genesis, this is a must-own.

Even though this game is much more 'breakout' in nature, I almost want to call this an action/pinball game. It's just too awesome.. touareg looks WAY TOO UGLY,there is a freaking mclaren F1 in a RAID pack that DOESNT EVEN HAVE RAID SPEC SO WHY THE HELL PUT IT HERE? just one word:DONT BUY THIS PACK UNLESS YOU HAVE IT FOR FREE IN SEASON PASS
